13.4 Assessing Psychological Tests

Find a psychological test online that tests either personality, IQ, achievement, or interests (anything psychological but mental illness).

Take your test. Record your results. Retake your test. Record your results.

Comment on the following regarding your test.

1. What type of test did you take?
2. How/for whom would it be useful?
3. Was the site you took your test from covered in ads? Why might this be a consideration in the validity/reliability of a psychological test?
4. What are some things you need to be careful of when taking online psychological tests?
5. Is your test reliable? Why or why not?
6. Is your test valid? How do you know?
